

ASK THE EXPERT

YOUR KNOWLEDGE CAN MAKE A DIFFERENCE

Sometimes the educational community requires a more simplified and less time consuming method of acquiring expert knowledge. This is what the Ask the Expert program is all about. The online forum is monitored by hundreds of researchers and experts across Canada and moderated by partners and stakeholders of VROC. It is an online community that provides a place for Canadian teachers and students to pose specific questions regarding specific topics in the fields of health and natural sciences, technology, engineering and mathematics. Questions are posted regularly and the expert community logs on as time permits to answer them. The Ask the Expert forum helps to ensure that the information being taught within the school system is current, accurate and relevant.
